

# The Right Solution For You<sup>SM</sup>

## A Scalable Supply Chain Solutions Company

*Since its inception in 1961, Zeller Corporation has evolved into a world-class, scalable supply chain management company that offers a diverse range of high-tech products, customized solutions and value-add services to industrial, municipal and institutional markets. Zeller Corporation, headquartered in Rochester, New York, owns and operates the following companies:*

## Industrial Automation and Controls

**Zeller Electric** is a high-tech distributor of electrical and mechanical components for industrial automation and controls customers. In addition to component parts, Zeller Electric designs, builds, installs and services complete systems. We also offer a comprehensive and diverse range of value-add services, as well as in-depth product training for our customers. For more information, please send your inquiry to [info@zellercorp.com](mailto:info@zellercorp.com).

## Vision Inspection

**Zynergy Solutions** is a turnkey provider of integrated machine vision and motion solutions for high-speed, automated assembly applications. Zynergy has years of experience integrating vision and motion solutions into Pharmaceutical, Consumer Products, Medical Device and general manufacturing applications for Fortune 100 companies. Zynergy, which has systems deployed and in use throughout the world, has extensive experience working with end users, OEMs and machine builders. For more information, please send your inquiry to [info@zysolutions.com](mailto:info@zysolutions.com).

## Motion Control

**RC Controls** provides motion control solutions to manufacturers and machine builders for a variety of manufacturing systems. From turnkey systems to consulting, RC Controls expertise ranges from low-cost to high-performance systems. RC Controls' staff is expert in machine retrofits, motion control concepts and applications, and component selection. RC Controls' sales and application engineers are highly experienced in numerous areas, including servos and steppers, actuators, robotics, mechanical analysis, system design, PLCs, pneumatics and cable assemblies. For more information, please send your inquiry to [info@rccontrols.com](mailto:info@rccontrols.com).

## Process Control

**VSG Enviromation** is a full-service automation and process control systems provider that specializes in consulting, design, manufacturing, and implementation of custom solutions for municipal and industrial markets. VSG Enviromation can assist you at every level of process control, from state-of-the art SCADA systems and telemetry to custom panel fabrication, controllers, technical support and service. To date, VSG Enviromation has successfully installed more than 2,000 systems that assist water and wastewater plants. For more information, please send your inquiry to [info@enviromation.com](mailto:info@enviromation.com).
